

Thomas R. Hunt III, M.D., D.Sc.

Digital Vascular Insufficiency

NOTE—All patients should be treated for edema control, scar management, silicone gel and desensitization as needed.

Daily Treatment

Neurostat cream (assess patient for contraindications for use of this prescription)

Use small amount of cream on area. Reapply 2-3 times per day as the area dries out.

Reapply before bedtime

Use gauze and Coban to maintain the cream in place

Splint PRN to protect the area

Decrease use as pain decreases
